No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (222 Rosewood Drive, Danvers, Massachusetts 01923), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1996 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

This journal is printed on acid-free paper.

CONTENTS OF VOLUME 336

Number 1, December 1, 1996

PERSPECTIVES IN BIOCHEMISTRY AND BIOPHYSICS

- Lycopene: A Biologically Important Carotenoid for Humans? *Wilhelm Stahl and Helmut Sies* 1

RESEARCH REPORT

- Molecular Determinants of Golgi Retention in the Punta Toro Virus G1 Protein *Yumiko Matsuoka, Si-Yi Chen, Cherie E. Holland, and Richard W. Compans* 184

BIOLOGICAL OXIDATIONS AND P450 REACTIONS

- Oxidative Modification of Nicotinamide Nucleotide Transhydrogenase in Submitochondrial Particles: Effect of Endogenous Ubiquinol *Patrik Forsmark-Andrée, Bengt Persson, Rafael Radi, Gustav Dallner, and Lars Ernster* 113
- Inhibition of Acetylcholinesterase by the Neurotoxicant, 1-Methyl-4-phenyl-2,3-dihydropyridinium Ion *Lun-Yi Zang and Hara P. Misra* 147
- Human Endothelial Nitric Oxide Synthase: Expression in *Escherichia coli*, Coexpression with Calmodulin, and Characterization *Ignacio Rodríguez-Crespo and Paul R. Ortiz de Montellano* 151
- Protein and Peptide Alkoxy Radicals Can Give Rise to C-Terminal Decarboxylation and Backbone Cleavage *Michael J. Davies* 163

BIOPHYSICAL CHEMISTRY AND X-RAY CRYSTALLOGRAPHY

- Physicochemical Characterization of Plasma Membranes from Density-Separated Trout Erythrocytes *Rosita Gabbianelli, Anna Maria Santroni, Giancarlo Falcioni, Enrico Bertoli, Giovanna Curatola, and Giovanna Zolese* 157

ENZYME STRUCTURE AND MECHANISMS; CELLULAR REGULATION; PHOSPHORYLATION AND DEPHOSPHORYLATION

- Production, Characterization, and Reconstitution of Recombinant Quinoprotein Glucose Dehydrogenase (Soluble Type; EC 1.1.99.17) Apoenzyme of *Acinetobacter calcoaceticus* *Arjen J. J. Olsthoorn and Johannes A. Duine* 42
- Eubacteria-Type Isocitrate Dehydrogenase from an Archaeon: Cloning, Sequencing, and Expression of a Gene Encoding Isocitrate Dehydrogenase from a Hyperthermophilic Archaeobacterium, *Caldococcus noboribetis* *Miho Aoshima, Akihiko Yamagishi, and Tairo Oshima* 77
- Studies on the Nocodazole-Induced GTPase Activity of Tubulin *Marisan R. Mejillano, B. D. Shivanna, and Richard H. Himes* 130
- Properties of Poly(ADP-ribose) Glycohydrolase Purified from Pig Testis Nuclei *Hideaki Abe and Sei-ichi Tanuma* 139
- Interaction of a Dimeric Mitochondrial Precursor with Phospholipid Vesicles: Direct Association of Each Subunit with the Membrane Is Required for Loss of Functionality *Alan Berezov, Ana Iriarte, and Marino Martinez-Carrion* 173

GENE EXPRESSION, TRANSCRIPTION, AND TRANSLATION

- Regulation and Properties of Bone Alkaline Phosphatase during Vitamin C Deficiency in Guinea Pigs *Fatemeh Mahmoodian, Anna Gosiewska, and Beverly Peterkofsky* 86
- Sequence and Tissue-Dependent RNA Expression of Mouse FAD-Linked Glycerol-3-Phosphate Dehydrogenase *R. A. Koza, U. C. Kozak, L. J. Brown, E. H. Leiter, M. J. MacDonald, and L. P. Kozak* 97

GLYCOCONJUGATES AND OLIGOSACCHARIDES; PROTEOGLYCAN AND EXTRACELLULAR MATRICES

- Heparin Causes the Accumulation of Heparan Sulfate in Cultures of Arterial Smooth Muscle Cells
Susan Potter-Perigo and Thomas N. Wight 19
- Structure and Antigenicity of the Mannans of *Candida famata* and *Candida saitoana*: Comparative Study
with the Mannan of *Candida guilliermondii* Nobuyuki Shibata, Masako Onozawa, Norihiko Tadano,
Yasuko Hinosawa, Akifumi Suzuki, Kyoko Ikuta, Hidemitsu Kobayashi, Shigeo Suzuki,
and Yoshio Okawa 49

LIPIDS, LIPID MEDIATORS, AND GLYCOLIPIDS

- Signaling Responses to Alkyllysophosphatidic Acid: The Activation of Phospholipases A₂ and C and Protein
Tyrosine Phosphorylation in Human Platelets Stanislav I. Svetlov, Athanassia Siafaka-Kapadai,
Donald J. Hanahan, and Merle S. Olson 59

MEMBRANE PROTEINS AND TRANSPORT; INTRACELLULAR SIGNALS; CYTOKINES AND RECEPTORS

- A Mitochondrial Signal Peptide from *Neurospora crassa* Increases the Permeability of Isolated Rat Liver
Mitochondria Patricia M. Sokolove and Kathleen W. Kinnally 69

PLANT BIOCHEMISTRY AND MOLECULAR BIOLOGY

- Amino Acid Sequence of a New 2S Albumin from *Ricinus communis* Which Is Part of a 29-kDa Precursor
Protein José Godinho da Silva Jr., Olga L. T. Machado, Clarice Izumi, Júlio César Padovan,
Brian T. Chait, Urooj A. Mirza, and Lewis J. Greene 10
- Cloning and Expression of a cDNA Encoding Uridine Kinase from Mouse Brain Patricia A. Ropp
and Thomas W. Traut 105
- Affinity Chromatography, Substrate/Product Specificity, and Amino Acid Sequence Analysis of an Isoflavone
O-Methyltransferase from Alfalfa (*Medicago sativa* L.) Xian-Zhi He and Richard A. Dixon 121

PROTEIN STRUCTURE AND FUNCTION; PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING

- Proteolytic Processing of Human Lactase-Phlorizin Hydrolase Is a Two-Step Event: Identification of the
Cleavage Sites Marcel Wüthrich, Jürgen Grünberg, Dagmar Hahn, Ralf Jacob, Ilona Radebach,
Hassan Y. Naim, and Erwin E. Sterchi 27
- Prolyl Aminopeptidase Gene from *Flavobacterium meningosepticum*: Cloning, Purification of the Expressed
Enzyme, and Analysis of Its Sequence Ana. Kitazono, Tsutomu Kabashima, Hua-Shan Huang,
Kiyoshi Ito, and Tadashi Yoshimoto 35

Number 2, December 15, 1996

BIOLOGICAL OXIDATIONS AND P450 REACTIONS

- Influence of Superoxide Radical and Hydrogen Peroxide on Arachidonic Acid Mobilization
Javier Martínez and Juan J. Moreno 191
- Cloning, Sequencing, and cDNA-Directed Expression of the Rat Renal CYP4A2: Arachidonic Acid ω -Hydrox-
ylation and 11,12-Epoxidation by CYP4A2 Protein Mong-Heng Wang, David E. Stec, Michael Balazy,
Vladimir Mastuygin, Chung S. Yang, Richard J. Roman, and Michal Laniado Schwartzman 240
- Interaction of Polycyclic Aromatic Hydrocarbons with Human Cytochrome P450 1A1: A CO Flash Photolysis
Study Aditya P. Koley, Jeroen T. M. Buters, Richard C. Robinson, Allen Markowitz,
and Fred K. Friedman 261

- Molecular Cloning and Kinetic Characterization of a Flavin-Containing Monooxygenase from *Saccharomyces cerevisiae* Jung-Keun Suh, Lawrence L. Poulsen, Daniel M. Ziegler, and Jon D. Robertus 268
- Isolation and Identification of a Protein with Capsaicin-Inhibited NADH Oxidase Activity from Culture Media Conditioned by Growth of HeLa Cells Francis Wilkinson, Chinpal Kim, NaMi Cho, Pin-Ju Chueh, Scott Leslie, Silvia Moya-Camarena, Lian-Ying Wu, Dorothy M. Morré, and D. James Morré 275
- Reactive Oxygen Species-Mediated Inactivation of Pyruvate Dehydrogenase Tahereh Tabatabaie, Jamaica D. Potts, and Robert A. Floyd 290

ENZYME STRUCTURE AND MECHANISMS; CELLULAR REGULATION; PHOSPHORYLATION AND DEPHOSPHORYLATION

- Glutathione S-Transferases of Female A/J Mouse Liver and Forestomach and Their Differential Induction by Anti-carcinogenic Organosulfides from Garlic Xun Hu, Patrick J. Benson, Sanjay K. Srivastava, Lisa M. Mack, Hong Xia, Vicram Gupta, Howard A. Zaren, and Shivendra V. Singh 199
- Kinetic and Chemical Mechanisms of the Sheep Liver 6-Phosphogluconate Dehydrogenase Nancy E. Price and Paul F. Cook 215
- An Important Role for Pentose Cycle in the Synthesis of Citrulline and Proline from Glutamine in Porcine Enterocytes Guoyao Wu 224
- The Consequences of Replacing Histidine 356 in Isocitrate Lyase from *Escherichia coli* Abdur Rehman and Bruce A. McFadden 309

GENE EXPRESSION, TRANSCRIPTION, AND TRANSLATION

- Identification of Multiple Rabbit Flavin-Containing Monooxygenase Form 1 (*FMO1*) Gene Promoters and Observation of Tissue-Specific DNase I Hypersensitive Sites Zhaohui Luo and Ronald N. Hines 251
- Characterization of the Aryl Hydrocarbon Receptor Complex in Human B Lymphocytes: Evidence for a Distinct Nuclear DNA-Binding Form Scott A. Masten and Kathleen T. Shiverick 297

MEMBRANE PROTEINS AND TRANSPORT; INTRACELLULAR SIGNALS; CYTOKINES AND RECEPTORS

- Characterization of Cellular Retinoic Acid-Binding Protein I from Chick Embryo and Its Ligand Binding Properties Pratap Venepally, Lakshmi G. Reddy, and Brahma P. Sani 231

PLANT BIOCHEMISTRY AND MOLECULAR BIOLOGY

- High Level Expression of *Ricinus communis* Casbene Synthase in *Escherichia coli* and Characterization of the Recombinant Enzyme Alison M. Hill, David E. Cane, Christopher J. D. Mau, and Charles A. West 283

- AUTHOR INDEX FOR VOLUME 336 316
- CUMULATIVE AUTHOR INDEX FOR VOLUMES 325-336 317
- CUMULATIVE SUBJECT INDEX FOR VOLUMES 325-336 326

Digitized by the Internet Archive
in 2026

Archives of BIOCHEMISTRY AND BIOPHYSICS is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Research Reports** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Research Reports provide a mechanism for rapid publication of short but complete manuscripts on outstanding and novel research findings. They should consist of 1000 or fewer words of text and a total of six or fewer figures and tables. The first paragraph should comprise an abstract of the principal findings without abbreviations followed by the background, rationale, and conclusions of the study. Experimental methods should be reported in the table or figure legends, not in the text. Acknowledgments may be included in a footnote to the title. Omit the abstract and text subheadings, and keep literature citations to a reasonable minimum. The scientific quality of these reports should be of the highest caliber to facilitate rapid review. Authors should identify the manuscript as a Research Report and submit it directly to the Editorial Office of the journal (see below).

Accelerated status may also be given to those manuscripts that are reviewed as outstanding and that require little or no revision. At submission, authors may request accelerated publication of their manuscript. To expedite publication of such articles, authors will not receive proofs.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of BIOCHEMISTRY AND BIOPHYSICS

Editorial Office, 525 B Street, Suite 1900
San Diego, California 92101-4495

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

For nucleotide sequence data authors are encouraged to submit original nucleotide or amino acid sequence data to a databank such as GenBank or EMBL. A footnote that includes the accession number should be included on the title page. It is preferable that the sequence data be deposited either prior to submission or by the time of acceptance of the manuscript. However, a footnote can be added at the proof stage if the material is deposited after acceptance. For further information please contact the Editorial Office or GenBank or EMBL directly.

Policy regarding publication of experiments on unanesthetized animals conforms with the standards for use of laboratory animals established by the Institute of Laboratory Animal Resources, U.S. National Academy of Sciences. Experiments in which curariform agents are used must be justified and details of the steps taken to reduce or avoid distress to the animal must be provided, particularly with regard to electrical stimulation.

Original papers only will be considered. **Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the coauthors of the manuscript prior to its submission to the journal.** Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in **Archives**, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in **Archives of Biochemistry and Biophysics** represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal. Use of nonoriginal material (tables, figures, etc.) requires written permission from the copyright holder.

Form of manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8½

¹ An extended Instructions to Authors is published in the January issue of **Archives of BIOCHEMISTRY AND BIOPHYSICS**. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUBMB rules and recommendations, and accepted abbreviations.

× 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted:

Biological Oxidations and P450 Reactions
Glycoconjugates and Oligosaccharides; Proteoglycans and Extracellular Matrices
Lipids, Lipid Mediators, and Glycolipids
Biophysical Chemistry and X-Ray Crystallography
Membrane Proteins and Transport; Intracellular Signals; Cytokines and Receptors
Enzyme Structure and Mechanisms; Cellular Regulation; Phosphorylation and Dephosphorylation
Plant Biochemistry and Molecular Biology
Protein Structure and Function; Proteases, Protein Turnover, and Posttranslational Processing
Gene Expression, Transcription, and Translation

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name, complete mailing address, and telephone and fax numbers of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *ACS Style Guide* (American Chemical Society).

Key words should be listed immediately after the abstract. The following is an example to be employed.

Key Words: thioredoxins; NADP–thioredoxin reductase; *Acetabularia mediterranea*; chloroplasts.

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet; footnotes to tables should be identified by superscript lowercase italic letters (*^a*, *^b*, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings, and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. They should be planned to fit the proportion of the printed page ($7\frac{1}{8} \times 9$ in.; column

width, $3\frac{1}{2}$ in.) and submitted no larger than $8\frac{1}{2} \times 11$ in. Lettering on drawings should be of professional quality or generated by *high-resolution* computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth-surface white paper, or Bristol board. Alternatively, *high-quality* computer graphics may be acceptable. Graph paper, if used, should be ruled in blue. Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

Cover photographs. Suggestions for *cover photographs* are welcome. Submit them as slides with $8\frac{1}{2} \times 11$ -in. color or black-and-white prints to accompany specific articles. A short (one-line) legend should accompany each photograph.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of the most recent edition of *Chemical Abstracts Service Source Index*. Please note the following examples.

1. Terry, M. J., Wahleithner, J. A., and Lagarias, J. C. (1993) *Arch. Biochem. Biophys.* **306**, 1–15.
2. Birren, B., and Lai, E. (1993) *Pulsed Field Gel Electrophoresis: A Practical Guide*, Academic Press, San Diego.
3. Buchanan, S. K., and Walker, J. E. (1995) in *A Practical Guide to Membrane Protein Purification* (von Jagow, G., and Schagger, H., Eds.), pp. 125–133, Academic Press, San Diego.

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.

Personal computer disks. Authors are encouraged to submit floppy disks with their articles once the manuscripts have been accepted and after all revisions have been incorporated onto the disk. Please label the disk with the type of computer used, the type of software and the version number, and the disk format. Clearly indicate the file names and contents of each file.

Manuscripts will be edited according to the style of the journal, and the proofs must be read carefully by the author. Please note that tabular material will be typeset conventionally. Every effort will be made to use the disk for the remainder of the article.

For further information, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, 525 B Street, Suite 1900, San Diego, California 92101-4495; telephone: (619) 699-6870; fax: (619) 699-6800).
